

04 — HALF-DAY WORKSHOP

The Rebuild Method™ Workshop

The framework, worked through rather than watched. Small groups move through all seven steps with guided stillness, imagination work, and a written next-step commitment each person leaves with.

WHAT THE ROOM LEAVES WITH

- A completed personal rebuild map.
- Two stillness practices that work in ordinary settings.
- An imagination exercise for a future that isn't visible yet.
- One committed next step, written down and witnessed.

ABOUT JOE

Joe Jackson is a designer of 25+ years and the founder of Digital Landscaper and Artist Growth System. In June 2020 a car crash left him with a traumatic brain injury, a broken neck, and nearly a year in a wheelchair. The rebuild that followed became The Rebuild Method™ — the framework behind his keynotes. He speaks from the patient's chair and the designer's desk, currently traveling the country by RV.

ALSO AVAILABLE

- 01 You Don't Bounce Back — You Build Forward.
- 02 Designing the Room Around Recovery
